

JOSHUA Y. LEE 이용준

Network Engineer · Founder of Zennix · Security-First Builder

Chicago, IL · janktester@gmail.com · linkedin.com/in/joshua-lee-b182b2149 · jankykohh-boop.github.io/Portfolio

SUMMARY ~/about

소개

Technical professional with 7 years translating complex requirements into documented, shipped outcomes in regulated enterprise environments: writing requirements, process documentation and audit-ready control evidence, and driving cross-functional work to closure. Founded Zennix, a legal-AI practice-management product, owning the roadmap, specifications, security and release decisions while directing AI-assisted development with Claude Code.

SKILLS ~/skills

기술

product	Requirements and acceptance criteria, process and workflow design, backlog management in Jira and Jira Service Management, Agile/SDLC, UAT and release validation, technical documentation, stakeholder communication
analysis	Root-cause investigation, usage and asset data analysis, risk assessment and prioritization, compliance reviews
technical	Python, PowerShell, Bash, SQL, REST APIs, Git, ServiceNow (ITSM: incident and change), AI-assisted development (Claude Code)
domain	Legal technology, generative-AI guardrails, ISO 27001, NERC CIP, identity and access management (Okta)
languages	English (native), Korean (professional working proficiency)

PRODUCT EXPERIENCE ~/zennix

제품

Zennix · Founder & Product Owner (independent)

2026 - Present

Legal-ai platform for solo & small law firms · pre-launch · I spec and test; Claude Code implements

- ▶ Authored the roadmap as six milestones with definitions of done, leverage-ranked features, recorded risks and explicit "not building this yet, and why" decisions.
- ▶ Write the specs and acceptance criteria for every change, then review and test everything implemented with Claude Code before release.
- ▶ Security review on every feature and fix: threat modeling, role-based access and tenant isolation, input validation and injection protection, secrets management, dependency scanning, audit logging, encryption of client data, and self-testing of access controls.
- ▶ Designed privacy and AI guardrails that keep the product within legal professional-responsibility rules.
- ▶ Built AI cost instrumentation to inform pricing decisions.

PROFESSIONAL EXPERIENCE ~/experience

경력

Exelon Corporation · Wireless Network Engineer

Oakbrook Terrace, IL · Apr 2023 - Present

- ▶ Work incidents from the ServiceNow queue: investigate end-to-end connectivity anomalies, establish root causes and drive remediation against documented timelines.
- ▶ Execute NERC CIP change controls through ServiceNow change tickets, producing audit-ready documentation for external reviews.
- ▶ Lead asset audits for ~3,000 devices, surfacing unmanaged endpoints and producing CIP-002 / CIP-010 evidence.
- ▶ Identified and decommissioned unused services and devices, reducing spend by ~\$5,000/month (~\$60,000 annually).

XSELL Technologies · Cybersecurity Analyst · promoted from IT Operations Analyst Chicago, IL · May 2021 - Nov 2022

- ▶ Supported a 250-user organization through Jira Service Management, resolving 15–60 tickets a day against business-driven SLAs: onboarding and offboarding, password/MFA and lockout issues, SaaS access requests, and hardware, network and VPN troubleshooting; wrote knowledge-base articles and how-to guides.
- ▶ Designed and documented scalable access-review and change-management workflows adopted as org-wide standards.
- ▶ Supported ISO 27001 certification by producing control evidence and process artifacts for audit reviews.
- ▶ Implemented Okta SSO and group-based access for 200 users, enforcing least privilege across SaaS apps.
- ▶ Administered Jira permissions and automation; investigated security events and tuned Elastic Security detection rules to improve coverage.

CDW · Service Support Technician

Vernon Hills, IL · Jul 2019 - May 2021

- ▶ Deployed enterprise devices for large government projects; tracked assets and validated configurations under strict standards.

EDUCATION & CERTIFICATIONS ~/cents

자격증

B.S., Cybersecurity and Information Assurance · Western Governors University

Dec 2025
